

APPENDIX F: LIST OF ILECs

The ILECs listed below provide local service to Texas customers. They are arranged according to their most recently available annual revenues. The number of access lines shown provides an approximation of their number of customers.

The dollar figure in the Capitalization column indicates the value of debt and equity of the parent company in its most recent financial statement, which in most cases was year-end 1998 or year-end 1999.¹¹⁶

¹¹⁶ The Commission's Financial Review Division made a determination which subsidiary of a company was the parent based on financial statements and experience in the industry. Staff did not contact or ask the firm directly for this information, so the Commission does not claim that the identification of the parent companies is exact. Nor did staff make an attempt to determine the market capitalization of the publicly traded companies in this survey. Thus, the figures presented in this analysis should be considered illustrative rather than definitive.

¹¹⁷ Some of the companies listed above are owned by a common parent company. Notes on company relationships:

Lufkin-Conroe Telephone Exchange, Inc., an ILEC that elected regulation pursuant to PURA, Chapter 59 on 8/18/97, was purchased by Texas Utilities (TU) in November 1997. In May 1999, TU

changed its name to TXU Communications Telephone Company (TXU). On 5/12/2000, TXU and Fort Bend Telephone Company merged. The merged companies, TXU and Fort Bend Telephone Company, are owned by TXU Corporation (50%) and a group of private investors (50%).

GTE Southwest, Inc. and Contel of Texas, Inc., two sister ILECs that elected regulation pursuant to PURA, Chapter 58 on 9/20/95, merged with Bell Atlantic this year to form a new company, Verizon. On September 1, 2000, Verizon sold approximately 200 Texas telephone exchanges to a newly-formed company, Valor, Inc. Valor elected to be regulated pursuant to PURA, Chapter 59, but agreed to honor the Chapter 58 commitments made by GTE and Contel pursuant to PURA, Chapter 58.

Alltel Corporation owns two ILECs in Texas, including Alltel Texas, Inc. and Sugar Land Telephone Company, an ILEC that elected to be regulated pursuant to PURA, Chapter 59, on 10/20/95.

Sprint Corporation owns two ILECs in Texas formerly known as Central Telephone Company of Texas, Inc. (Centel) and United Telephone Company of Texas, Inc. The Sprint companies elected to be regulated pursuant to PURA, Chapter 59 in 1997.

APPENDIX G: LIST OF CLECs

Below is a list of entities that have been awarded a COA or an SPCOA certificate as of December 31, 2000. Certificate approval indicates only that the company has Commission permission to provide telecommunications services (*i.e.*, some may not yet be offering services and some may no longer be in business). Because the telecommunications market is increasingly dynamic, this appendix reflects only a static view of potential competitors. The Commission web site periodically posts an updated version of this list at <http://www.puc.state.tx.us>.

How to use this list:

Companies named include those that were recently certified. Since the data period of the request concerned only the calendar years 1998 and 1999, many of these companies did not provide information because they were either not yet certified or were not yet in operation. Companies are alphabetized by most recent names, with previous or secondary names listed afterward.

Information listed in the “Filed Data Request” column indicates the following:

- **Y:** Yes, the company responded to the report request for this report
- **N:** Certificate is in force, but the company did not reply to the data request
- **New:** Company was certificated in 2000 and therefore is too new to have replied to the data set

Information listed in the “ICA” column indicates the following:

- **Y:** Yes, the company has an approved interconnection agreement
- **N:** No, the company does not have an interconnection agreement

APPENDIX H: PUC DATA COLLECTION – REGIONAL GROUPINGS AND DATA REQUESTED

Parties in these proceedings explored methods by which to gather and aggregate useful information without compromising confidentiality of competitively sensitive data. As a result, the data are first aggregated by county, and then the largest counties in the state are grouped according to size. Because the Rural category of counties (populations below 100,000) still varied so widely in both population and access to services, data for them were separated by geographic area and by size grouping. The geographic areas used for this study correspond to boundaries of the 24 Councils of Government (COGs) areas in Texas, with two exceptions.¹¹⁸ Within each of the 22 resulting geographic areas, then, the counties were separated into three population size groupings.

Data Collection: A Regional Approach

In a recent FCC report on the deployment of advanced services, the FCC found a strong correlation between deployment of advanced services and population density and income of an area.¹¹⁹ This finding is consistent with the historical spread of telephone service in Texas and other places in the country. The large cities were the first to get telephone service. While the private sector readily provided telephone service to densely populated and wealthy areas in Texas, residents in the poorer and more rural areas of Texas formed utility cooperatives to provide telephony to areas that private-sector companies found insufficiently profitable.

In order to capture the unfolding of competition in Texas, the Commission developed a data collection instrument that collected data on a regional basis that reflects the diversity of the Texas population. Commission staff designed the categories of data requested to show the level and growth of competition across different areas of Texas and to provide information as to the distinction among facility-based providers and resellers. The questions asked in the data request are shown below in this appendix.

When responding to the data collection instrument, CLECs and ILECs aggregated the data first by county, and then the largest counties in the state are grouped according to size, as charted earlier in Chapter 3 of this *Report*.¹²⁰ Because the Rural category of counties still varied so widely in both population and access to services, data for them was separated by geographic area and by size grouping. The geographic areas used for this study correspond to boundaries of the 24 Councils of Government (COGs) areas in Texas, with two exceptions.¹²¹ Within each of the 22 resulting geographic areas, then, the rural counties were separated into three population size groupings.¹²² In this manner, the CLECs and ILECs reported their data used this report in 69 geographic and size groupings. Below follows a cross-reference between the county name and the geographic/size reporting area to which the county has been assigned.

¹²⁰ Counties with over 600,000 people form Group 1 – Large Metro. Counties with over 100,000 people that are in the same metro are as the counties in Group 1 form Group 2 – Suburban. Counties with at least 100,000 people that are not already in Groups 1 and 2 form Group 3 – Medium and Small Metro. Counties with fewer than 100,000 people form Group 4 – Rural.

¹²¹ To further protect confidentiality, counties in the Deep East Texas Council of Governments are combined with the South East Texas Regional Planning Commission, and counties in the South Texas Development Council are combined with the Lower Rio Grande Valley Development Council.

¹²² By size: counties below 5,000 population, those between 5,000 and 20,000, and those between 20,000 and 100,000.

APPENDIX I: SOCIOECONOMIC PROFILE OF TEXAS

The following subsections profile the population, population density, and *per capita* income of Texas by county or region for this report, which is consistent with the breakdown of the data by region used in the data collection instrument.

Population

The population of Texas as of January 1, 1999, was 19.9 million. (See Table 33) Though Texas is a large state geographically, much of its population is clustered in urban areas. The Large Metro areas had a population of 9.4 million, or nearly half of the population of Texas. Together, the Suburban and Large Metro areas represent nearly 60% of the Texas population. The Small and Medium Metro areas of Texas represent about one fifth of the Texas population, as do the Rural areas of Texas.

Table 33 – Texas Population by Group

Group	Description	1990	1999	Percent of Total in 1999	Growth Rate 1990-1999
1	Large Metro	8,194,425	9,439,438	47.4%	15.2%
2	Suburban	1,493,837	2,161,912	10.8%	44.7%
3	Medium and Small Metro	3,319,290	3,851,471	19.3%	16.0%
4	Rural	3,978,783	4,472,758	22.4%	12.4%
Total	State of Texas	16,986,335	19,925,577	100.0%	17.3%

Source: Texas State Data Center

The population of Texas has been growing rapidly in the past decade, especially in the Suburban areas. The population of Texas grew from 17.0 million in 1990 to 19.9 million in 1999, an increase of 17.3 percent overall, but the Suburban areas grew 44.7%. Growth in each of the other three categories was shared rather evenly, at levels near the statewide average.

However, within the Rural category, the growth rates varied widely, as can be observed in the table below. Of the 4.5 million people living in Rural areas of Texas in 1999, 72.4 percent lived in counties with a population of 20,000 or more residents. Those counties saw population growth of 15.3 percent. Only 138,000 people, or less than one percent of the population of Texas, lived in counties that had 5,000 people or fewer, and those counties saw an actual decrease in population of 0.6%.

Population Density

Figure 16 shows population density by county for Texas in 1999. Not surprisingly, population density is high along the I35 corridor from San Antonio to the Oklahoma border, in the Houston/Galveston area, and in El Paso. Population densities are much higher on average in rural areas of East Texas than in rural areas of West Texas, with many counties in West Texas having fewer than five people per square mile.

Income

Figure 17 shows the *per capita* income by county for Texas in 1998. The wealthiest areas in Texas (incomes greater than \$25,000) are metropolitan areas of Dallas / Fort Worth, Houston, and Austin. Other areas of the state showing high *per capita* incomes are areas associated with the oil industry: the northern Panhandle and Midland County in West Texas, and Smith County (Tyler metro area) in East Texas. Income in the oil-producing areas is more volatile than in the Large Metropolitan areas of Texas. The poorest areas in the state (incomes less than \$13,500) are adjacent to or near the Rio Grande Valley and in West Texas.
